DETAILED ACTION

Election/Restrictions

1. This application contains claim 18-29 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

2. *The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.*

3. Claims 1-3, 5-13, and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zamora et al. (6,613,432) in view of Totakura (5,383,903).

Examiner maintains the rejections of the previous office action.

4. Claims 4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zamora in view of Totakura as applied to claims 1-3, 5-12, and 14-17 above, and further in view of Hu (5,463,010).

Examiner maintains the rejections of the previous office action.

Response to Arguments

5. Applicant's arguments filed 3/30/2006 have been fully considered but they are not persuasive.

Applicant argues that Zamora and the other references fail to disclose or suggest a method for improving the fray resistance of a suture.

Examiner notes that such a requirement is present only in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Additionally, Examiner notes that coating the same substrate with the same materials as Applicant would inherently achieve improved fray resistance.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Examiner is aware that the references cited, individually, have deficiencies, but that is why an obviousness rejection has been made.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
